Kerry Carpenter
Division of Water Rights
585 N. Main
Cedar City, UT 84720

Dear Mr. Carpenter,

In July of 2004 Hurricane City wrote to you concerning monitoring of the Lichfield well associated with change application a-27370. Our concern was, and still is, that the well's output could affect the output of the Ash Creek Springs. While we have had a wet year, we would still like to be assured that the 30 AF allowed under the water right for the Lichfield well is all that is being pumped.

Hurricane City requests copies of output reports from the Lichfield well for the past year so we may put our concerns to rest.

Sincerely,

Mac J. Hall
Public Works Director
